

PROVIDENCIA[®] BULK RUM

FROM COLOMBIA TO THE WORLD
CONSISTENCY OVER TIME

WHO ARE WE?

Providencia Bulk Rum was born in the Providencia sugar mill, one of the most solid references in Colombia's agro-industrial sector, part of the Ardila Lülle Organization (OAL), with almost **100 years of experience** in sugarcane cultivation and processing.

OUR PROCESS FROM A PRIVILEGED LOCATION IN COLOMBIA.

A country privileged by its **climatic diversity and geographical position**, which allows us to take advantage of unique growing, fermentation and aging conditions. This natural environment translates into **distinctive sensory profiles, ideal for blends and developments with character.**

**WHAT SETS US APART IS NOT
ONLY WHAT WE DO, BUT HOW WE DO IT.**

From the cane crop to the barrel, every stage is under our direct control. This allows us to offer a **safe, certified supply chain that is aligned** with the highest regulatory and environmental standards.

Annual distillery production: 100 million liters
and of that, it produces 25 to 30 million liters of liters of special alcohols

Quality and consistency over time:
Only those alcohols that meet our standards are destined for our Bulk Rum. Those that do not, are redirected to fuel alcohol.

We have more than **66,000** american white oak barrels.

The experience of our team is key to maintain a **constant, controlled process** aligned with the most demanding requirements of our customers.

FRESH, AGED AND ORGANIC BULK RUM

All our Bulk Rum are distilled from sugar cane juices, can be organic, fresh or aged in American white oak barrels under tropical climate.

MAIN CHARACTERISTICS:
